DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed July 12, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. The information referred to the not submitted non-patent literature documents has not been considered.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "3" and "5" have both been used to designate rotor and/or stator. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 2834

4. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In line 1, "The invention relates", line 3, "The invention also relates", and line 5, "According to the invention" contains phrases, which can be implied.

In line 2, "Said turbo-machine" is a legal phraseology.

Art Unit: 2834

6. The disclosure is objected to because of the following informalities: it contains segments that appear to be a literal translation into English from a foreign document and are replete with grammatical, idiomatic and various typographic errors.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 39 that depends on itself is indefinite.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. Claim 27 is rejected under 35 U.S.C. 102(b) as being anticipated by Baggs (US 3,187,191).

Baggs discloses invention as claimed: a rotor 20, a stator 12, 32, a flow duct 14,16 for guiding an action fluid, the action fluid provided for driving the rotor, and a magnet 22 for generating a predetermined magnetic field in the flow duct.

11. Claims 27, 28, 42 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Borzeix et al. (FR 2429517).

Borzeix et al. disclose invention as claimed: a rotor 18, a stator 15, a flow duct for guiding an action fluid 21, the action fluid provided for driving the rotor, and a magnet 5b for generating a predetermined magnetic field in the flow duct, wherein the magnet is arranged on the stator.

12. Claims 27, 28, 30-38, 42, 43 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Hannan, III (US 4,935,650).

Hannan, III discloses invention as claimed: a rotor 16, a stator 14, a flow duct for guiding an action fluid 34,36, the action fluid provided for driving the rotor, and a magnet 56 for generating a predetermined magnetic field in the flow duct, wherein the magnet is arranged on the stator.

Allowable Subject Matter

13. Claims 29, 30, 40, 41, 44, 45 and 47-53 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Re claims 29, 30, 44 and 45, the feature of the magnetic field oriented radially relative to a rotation axis of the rotor, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record. Claim 30 will be allowable as depending on claim 29.

Re claims 40, 41 and 47-53, the feature of the ionization device for generating charged particles included in the action fluid or the recombination device for the

Art Unit: 2834

recombining charged particles included in the action fluid, in combination with the other limitations present, are neither disclosed nor taught by the prior art of record.

Prior Art

14. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
